Katharine Susannah Prichard was born in 1883 to Australian parents then living in Fiji, but she grew up in Tasmania, lived for a while in both Melbourne and London before finally settling in Western Australia. She was one of the co-founders of the Communist Party of Australia in 1921, and her status as a communist and a female writer led to her being frequently under surveillance and harassment by the Australian police and other government authorities. She wrote *The Black Opal* in 1921, and the novel focuses on the very close-knit opal-mining community living and working on Fallen Star Ridge, a fictitious location set in New South Wales, Australia. Life is hard for the miners as their fortunes rise and fall with the amounts and quality of black opal they can uncover. Black opal is a beautiful mineral with fiery gleams of color, much valued for jewelry. Finding productive seams of such opal is a matter of both hard work and good luck. The novel is a well-drawn study of the relationships of the people living on the Ridge, and the two main characters are portrayed with clarity: Michael Brady, an older man much respected by the other miners for this knowledge and ethical approach, and Sophie Rouminof, a beautiful teenage girl who is the darling of the camp but who abruptly runs away to America after being disappointed in love. Despite the difficulties the individual miners face, there is a community spirit and an agreement on basic values and principles of behavior at the Ridge. But this community of shared endeavor is eventually jeopardized by the influence of outsiders, in particular an American who wishes to buy up the individual mines, operate them under a company structure, and simply pay the miners a salary. This conflict between capitalism and honest manual labour becomes one of the most important themes of the work. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

A traditional manuscript paper for Japanese writing is called Genkouyoushi. Compared to others, this notebook may be used with any type of writing instrument (pencil, pen or ink brush) with or without a shitajiki (under-sheet) and each template square allows for correct spacing of characters to fit one kanji, hiragana or katakana. It is a very perfect tool to learn writing in Japanese and it is especially useful to students for practice or formal assignments. Each page of this notebook is printed with vertical columns of squares, with each square designed to accommodate a single Japanese character or punctuation mark.

Learn the fundamentals of anesthesiology in the context of real patients. 4 STAR DOODY'S REVIEW! "The book targets medical students, but even junior anesthesia trainees would find it very compelling....Although it has the appearance of a handbook, this book is an overview of clinical anesthesiology. It takes a simulation approach to drive home essential concepts of anesthesia management in different disease conditions. Of all the handy books out there, this is perhaps the only one that teaches anesthesia in the context of real patients rather than merely stating facts. It would be an invaluable aid to medical students doing anesthesia clerkships or junior anesthesia trainees who need a quick review for an emergency case in the middle of the night."--Doody's Review Service Case Files: Anesthesiology contains 53 high-yield cases with open-ended questions. Each case includes an extended discussion, definitions, clinical Pearls, 3-5 USMLE-style comprehension questions, and references to the most current literature for further reading. Why do we forget about people when we talk about innovation? Innovation has been a popular subject for the last years. Bruce Nussbaum, perhaps exaggerating, said "Innovation died in 2008, killed off by overuse, misuse, narrowness, incrementalism and failure to evolve. It was done by CEOs, consultants, marketers, advertisers and business journalists who degraded and devalued the idea by conflating it with change, technology, design, globalization, trendiness, and anything new. It was done by an obsession with measurement, metrics and maths and a demand for predictability in an unpredictable world." If so, why another book on innovation? Because it is not one more book on the subject! It is a book that does not talk about innovation, but about people. Is there anything as important as people when innovating? This book describes how to

create a true culture of innovation, a culture where innovation is not an objective, but a consequence.

For nearly 80 years, shaft-drive boxer twins have traditionally formed the backbone of the BMW motorcycle line-up. For many enthusiasts of the Bavarian marque the classic BMW twin was the R90S of 1973-76. Over the decades, successive generations of durable machines - including the R100S, fully-faired R100RS, four-cylinder K-series, high-performance R1100RS and an entire family of touring and sporting models ranging from 850 to 1200cc - would ensure the BMW boxer twins a place in the Haynes "Great Bikes" series. This book covers: historical context, racing, the wartime R75 and R69S; the "75" series which enabled BMW to compete with the high-performance Japanese machines; the R90S, the "76" and Superbike performance; the R100RS, the "77" and the touring R100RT; smaller twins, smaller potential; the R89G/S, including a Paris-Dakar version; rationalization of the boxer range, and the new twins that included four-valve heads and electronic engine management; and technical specifications from 1969 to 2003.

The systems movement is made up of many systems societies as well as of disciplinary researchers and researches, explicitly or implicitly focusing on the subject of systemics, officially introduced in the scientific community fifty years ago. Many researches in different fields have been and continue to be sources of new ideas and challenges for the systems community. To this regard, a very important topic is the one of EMERGENCE. Between the goals for the actual and future systems scientists there is certainly the definition of a general theory of emergence and the building of a general model of it. The Italian Systems Society, Associazione Italiana per la Ricerca sui Sistemi (AIRS), decided to devote its Second National Conference to this subject. Because AIRS is organized under the form of a network of researchers, institutions, scholars, professionals, and teachers, its research activity has an impact at different levels and in different ways. Thus the topic of emergence was not only the focus of this conference but it is actually the main subject of many AIRS activities.

From the Iliad to Aristophanes, from the gospel of Matthew to Augustine, Greek and Latin texts are constellated with images of dreams. This cultural history draws on contemporary post-Freudian science and careful critiques of the ancient texts. Harris reminds us of specificities, contexts, and changing attitudes through history.

"This book presents five chapters describing the characteristics and behaviors of Bubalus bubalis, or domestic water buffalo. Chapter One provides an update on recent developments in the approaches for estrus detection in buffalo. Chapter Two explains the pelvimetry of the female buffalo reproductive system and the biometry of the reproductive system of male and female buffaloes. Chapter Three assesses the effect of slow-release subcutaneous exogenous melatonin implant on hematological profiles, endocrinological profiles, biochemical profiles and antioxidant and oxidative stress profiles in anestrus buffalo cows during the summer season to improve reproductive efficiency. Chapter Four consists of a study of Andaman local buffaloes that may serve as the reference values in which alterations due to metabolic, nutrient deficiency, physiological and health status can be compared for diagnostic and therapeutic purposes. Lastly, Chapter Five focuses mainly on the impact of heat stress on buffalo's behavior, physiology, metabolism, and acclimatization"--

Desmond Coke's "The Worst House at Sherborough," is a good example of the English public school genre story. First published in book form in 1913, the year before the

outbreak of the Great War. The main arch of the story concerns the various attempts made by Dick Hunter to improve the lackluster performance of Wilson's House. Owing to a reversal of family fortunes, Dick Hunter is faced with the alternative of leaving Sherborough or taking up the post of Head Boy in Wilson's House, usually known as "Weary Willie's" on account of its general slackness. To Hunter, a keen athlete, Captain of the Boats, and hitherto the most popular boy in School House, the idea of helping Wilson's "pull up its socks" is scarcely less repugnant than leaving the school altogether. However, Dick makes up his mind to go through with it. The "Willieites" have no desire to excel at games or anything else. Dick valiantly hammers away at this unpromising material for a long time without result; but at last he succeeds in cultivating enough enthusiasm among the younger boys, which in time leads to sporting glory for Wilson's.

For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. *Riding Man* is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.

What light does nearly 25 years of scientific study of the Exxon Valdez oil spill shed on the fate and effects of a spill? How can the results help in assessing future spills? How can ecological risks be assessed and quantified? In this, the first book on the effects of Exxon Valdez in 15 years, scientists directly involved in studying the spill provide a comprehensive perspective on, and synthesis of, scientific information on long-term spill effects. The coverage is multidisciplinary, with chapters discussing a range of issues including effects on biota, successes and failures of post-spill studies and techniques, and areas of continued disagreement. An even-handed and critical examination of more than two decades of scientific study, this is an invaluable guide for studying future oil spills and, more broadly, for unraveling the consequences of any large environmental disruption. Originally written by Armand Corre in 1889, *Crime in Creole Countries: Sketch of Criminal Ethnography* establishes a natural history of crime as it has been observed in countries of old French tradition where racial divides are present and fueled by differences in tendencies, interests, and aptitudes, despite the apparent unitary formula of metropolitan assimilation. This firsthand account of the time in which the French colonies within the West Indies were transitioning from slavery to emancipation was originally intended for magistrates and doctors of the colonies, showing them under what conditions, and under what motives (those being sometimes obscured or concealed) the crimes under their appraisal occurred. Scholars of criminology, race studies, Francophone studies, and history will find this book particularly useful.

Globalization has become a widely used buzzword, yet popular discussions often miss its deeper realities. This book offers the first clear explanation of the impact of colonialist legacies in a globalized world in an era defined by the "War on Terror." Sankaran Krishna explores the history of the relationship between Western dominance and the forms of resistance that have emerged to challenge it. Moving beyond the simple formulation of "They hate us because we are rich, we are free, and they are crazy," he asks, "What have we done that might generate such animosity? What face has the United States presented to the developing world over time? Krishna argues that we live on an interrelated globe, that history matters a great deal in constructing

contemporary realities, and that others create stories or narratives about the world based on their experiences just as we do based on ours. He contends that the interactions between the West and the non-West have not been politically innocent, economically egalitarian, or culturally benign in their consequences. Presenting a lucid exploration of the intertwined histories of both globalization and postcolonialism, this book uses compelling real-world examples to make sense of this crucial relationship.

Based on a highly acclaimed UK title, DRAFTING TRUSTS AND WILL TRUSTS IN AUSTRALIA has been comprehensively adapted to provide authoritative guidance on drafting trusts and will trusts in eight Australian jurisdictions. Providing both a comprehensive range of precedents and a wealth of valuable advice, DRAFTING TRUSTS AND WILL TRUSTS IN AUSTRALIA cuts through verbosity and helps you to understand and prepare trust documents your client wants and needs. The book features chapters on key areas of trust law, including beneficiaries, trustees, trustee's powers and general provisions of a trust. DRAFTING TRUSTS AND WILL TRUSTS IN AUSTRALIA also offers a large number of precedents for both lifetime and will trusts. The precedents, which appear in printed form and on an accompanying CD-Rom, reveal a fresh approach to creating documents. A unique addition to the Australian market, DRAFTING TRUSTS AND WILL TRUSTS IN AUSTRALIA is an essential reference for those practising in tax law, estate and succession planning, family law and property law.
