The 10th edition of this market-leading text offers an accessible, effective introduction to key accounting and finance topics. If you are new to accounting, or are studying a degree in accounting, this book will help you get to grips with the important principles of accounting and how to apply your learning to real-world business scenarios in a user-friendly manner.

Now in its 10th edition, Business Finance is an essential introduction to financial decision-making in businesses. Taking a user-friendly approach, it explores the type of investments a business should make and how they should be financed, and successfully blends the theoretical, analytical and practical aspects of finance and investments. The new edition has a strong real world focus, exploring the theories surrounding financial decision making and relating these theories to what happens in the real business world. Key features: An extensive range of up-to-date real-world examples Examination of the divergences between theory and practice Expanded explanations of complex theories Comprehensive coverage of the latest international issues Clear design and pedagogical features for enhanced readability and quick reference Visit the companion website for this book at [www.pearsoned.co.uk/mclaney](http://www.pearsoned.co.uk/mclaney) where you will find a variety of resources for students and lecturers alike. Business Finance is suitable for undergraduates in accounting and finance and for those on finance and financial management courses. It is also appropriate for postgraduate students with an option in accounting and finance and will be highly useful for professional accounting students. Eddie McLaney is Visiting Fellow in Accounting and Finance at the University of Plymouth.

This edition of 'Accounting and Finance for Non-Specialists' provides comprehensive coverage of the basic concepts and practical applications of financial accounting, management accounting and financial management.

It has never been more important for businesses to operate within a framework of strategic planning and decision making. This popular introductory text teaches you how to make the best choices in managerial and other business roles. This text is aimed at undergraduate students who wish to grasp key elements of management accounting and those seeking a foundation for further study. New to this edition · Expanded discussion of relevant costs for decision making · Increased coverage of cost management in a competitive environment · Increased coverage of inventories' management techniques · New chapter on managing risk · More activities throughout the text to enhance reader interaction and to encourage critical thinking. · More diagrams and real world examples to help illustrate issues and concepts

An introductory overview of the fundamentals in managing events, preparing students for a future career in events management and hospitality.

Managers involved at a senior level in the purchasing function require very particular financial skills. They need to: analyse the financial health and stability of their suppliers; model different cost and price scenarios; understand and manage budgets; and be comfortable with the financial aspects of capital purchases. Finance for Purchasing Managers is written from this perspective using buyer's language and interpretation. Richard France explores four key areas of expertise required of a buyer in today's environment: Financial analysis of suppliers - this includes understanding the financial aspects of a buyer's own organisation plus analysing key suppliers and how to use information to gain a negotiating edge. Pricing, costing and cost modelling - including costing methods and their application and how an understanding of these can give buyers a greater understanding when dealing with supplier quotations. Managing resources - including budgeting and sources of finance. This shows how budgets are drawn up and the importance of understanding the implications of the buyer's decisions on a supplier's cash flow forecast. Finally, capital and revenue purchasing decisions and techniques - covering standard investment appraisal techniques and how these can be used for deciding on the best deal from a choice of suppliers for both capital items as well as a standard long term parts supply contract. Finance for Purchasing Managers may be used to support the CIPS Level 6 Course 'Finance for Purchasers' but also offers a readable and practical guide for those at a senior level in purchasing whether in the public or private sector.

Accounting and Finance: An Introduction, now in its ninth edition, contains all the information you need to start your business career. With its use of practical techniques and real-world examples, this best-selling text teaches you the basics of understanding and using financial information.

In the past decade, the growing realization that biodiversity and human wellbeing are inextricably linked has led to the adoption of numerous environmental policies. The concept of the Green Economy has gained particular attention as an economic system where growth is possible within environmental limits. The preservation of ecosystem services and the halt of biodiversity loss are identified as key pillars of the Green Economy. Despite the concept's momentum there is still no clear understanding of how biodiversity fits within a Green Economy. In the current debate, biodiversity is rarely acknowledged in economic sectors other than agriculture, forestry, fisheries and tourism, and when it is acknowledged biodiversity and its conservation feature more as buzzwords than as concrete and tangible components of the Green Economy. This book aims to identify, understand and offer pragmatic recommendations of how biodiversity conservation can become an agent of green economic development. This book establishes ways to assess biodiversity's contributions to the economy and to meaningfully integrate biodiversity concerns in green-economy policies.

Accessible, learner-friendly and jargon free, this best selling text in financial accounting is the ideal starting point for non-accounting students. Clear and Concise it not only arms the reader with the basic principles of the subject, but actively encourages the reader to build on these through an 'open-learning' approach, involving the reader in various questions and activities along the way. The third edition has been thoroughly updated and revised improving existing features and expanding content. Features include \*New material on 'Social Reporting' \*Double entry book-keeping included as an appendix only \*An updated and revised selection of end-of -chapter, self-assessment, and review questions \*Improved glossary of technical terms Financial Accounting for Non-specialists is suitable for all undergraduate and postgraduate students from any discipline, taking an introductory course or module in financial accounting. The open-

learning approach also makes it suitable for those studying independently or on distance learning courses The Authors Peter Atrill is the head of the Department of Accounting and Law at the University of Plymouth Business School. Eddie McLaney is a Visitin

This is a text for introductory courses on cost and management accounting. It provides coverage of the elementary principles and techniques of costing and management accounting, and concentrates on the typical syllabus of a first year BA course.

Starting with the big picture of financial statements first, Paul Kimmel shows students why financial accounting is important to their everyday lives, business majors, and future careers. Kimmel, Accounting is designed for a two-semester financial and managerial accounting sequence that dedicates equal time financial and managerial accounting topics and teaches the accounting cycle from a corporate perspective.

'Financial Accounting for Decision Makers' presents the key concepts of accounting without going into too much unnecessary technical detail. The book is aimed as 'users' of accounting information, not 'preparers' of accounts.

First published in 1997, this volume and its contributors take stock of current issues in accounting and finance. Featuring specialists in business, accounting, finance along with Vice Chancellor John Bull, they examine areas including auditors' decision-making, financial shocks, the European corporate capital structure, GPs, accounting education and professional journals.

It has never been more important for businesses to operate within a framework of strategic planning and decision making. This 6th edition retains all of the classic features that have contributed to the book's success: clarity of expression, the focus on the accounting equation, student activities and real-life commentaries running through each chapter, and the inclusion of the Safe and Sure Annual Report as an example of a listed company.

This text is an introductory course in management accounting for those seeking an understanding of basic principles and underlying concepts without detailed technical knowledge. It has a strong practical emphasis, with plenty of examples taken from the real world as well as numerical examples with step-by-step explanations.

The 11th edition of this market-leading text offers an accessible, effective introduction to key accounting and finance topics. With a step-by-step approach and a focus on decision making, Accounting and Finance for Non-Specialists teaches you how to apply your learning to real-world business scenarios.

Now in its fifth edition, this successful text introduces the basic principles and underlying concepts of accounting and finance. It adopts a practical, non-technical approach, making it the ideal text for students from non-accounting disciplines. The text is written from a 'user' perspective, demonstrating ways in which accounting statements and financial information can be used to improve the quality of decision making.

With a comprehensive and accessible introduction to the subject, Financial Accounting for Decision Makers focuses on the ways in which financial statements and information can be used to improve the quality of decision making. The practical emphasis throughout the book ensures the material is always relevant, whilst the authors' style of introducing topics gradually and explaining technical terminology in a clear, friendly style caters for all students, whether on specialist accounting or non-specialist business degrees. The full text downloaded to your computer With eBooks you can: search for key concepts, words and phrases make highlights and notes as you study share your notes with friends eBooks are downloaded to your computer and accessible either offline through the Bookshelf (available as a free download), available online and also via the iPad and Android apps. Upon purchase, you will receive via email the code and

instructions on how to access this product. Time limit The eBooks products do not have an expiry date. You will continue to access your digital ebook products whilst you have your Bookshelf installed.

'Accounting for Business' is ideal for undergraduate students on business and accounting courses who need to understand the nuts and bolts of financial accounting. This popular textbook has always enjoyed a deserved reputation for accessibility and thoroughness. Now in its third edition, its contents have been fully updated and restructured to make them even easier to use. Readers will benefit from the coverage of current accounting practices and legislation, in addition to the range of worked examples and self-test activities throughout the book. 'Accounting for Business' clearly explains accounting information's role in making sound business decisions and focuses upon the aspects of accounting practice which are most relevant to the non-specialist manager. It is ideal for first year undergraduates of business studies, higher students and those pursuing professional accountancy qualifications. This third edition has been restructured, to further enhance its 'student centred' approach. The content has now been broken down into 25 roughly equivalent 'bite-sized' individual study topics. Each of these requires 6 hours of study time, enabling this book to support a full scale semester course with two topics a week, or a full year course at one topic a week. Includes a wide selection of topical case studies, with a broad spread of international examples.

Accounting: an introduction by Atrill provides a clear and approachable introduction to accounting and finance for those seeking to understand the main concepts and their practical application to good decision-making.

This is the new edition of the bestselling guide to understanding and using business accounts and accounting principles, written in a way that even the financially nervous novice can easily absorb. Accounting is generally viewed as a highly technical and complex subject. However, accounts are actually based on simple principles. It's not company accounts that are complex, it's all too often the way that they are explained. In this simple and easy read book, the author guides you through all the major accounting concepts. Discover how to master company accounts, understand balance sheets, profit and loss accounts and cash flow systems. Learn to analyse and monitor your company's financial performance. Accounts Demystified is the definitive, user-friendly guide to the fundamental principles of accounting that no manager will want to be without. In this 5th edition of the classic Accounts Demystified, Anthony Rice makes accounting astonishingly simple and pain-free.

This book is an essential introduction to the world of financing and investment decision making. With a strong real world focus, this text aims to help you bridge the gap between the theories surrounding financial decision making and what happens in the real business world in an accessible, user-friendly way. Alongside the book, you can visit the Business Finance companion website at [www.pearsoned.co.uk/mclaney](http://www.pearsoned.co.uk/mclaney) to access a comprehensive range of student-learning resources, including additional questions, web links for further reading and a glossary of key terms.

Financial Management for Decision Makers provides you with an introduction into the world of financial management. Assuming no previous knowledge of financial management, this book gradually builds your knowledge of the subject and how to apply these theories into practice. Alongside the book, you can visit the new Financial Management for Decision Makers companion website at [www.pearsoned.co.uk/atrill](http://www.pearsoned.co.uk/atrill) to access a comprehensive range of student-learning resources, including additional questions, web links for further reading and a glossary of key terms.

This volume addresses the core topic areas in corporate finance and establishes an integrated understanding of the three decision areas in finance - investment, financing, and the dividend decision.

The seventh edition of The Business Environment has been perfectly tailored to cover the core topics that will be studied on an introductory Business Environment module. This fully updated new edition provides comprehensive coverage of the varying factors that make up the business environment, with a particular focus on how these factors impact business organisations and the decisions organisations make. Key Features: Up-to-date coverage The business environment continues to evolve, and this new edition takes on board recent issues including: The after-effects of the 'credit crunch' The emerging economic power of China, India and Brazil Data security and privacy Business ethics Cultural identity Climate change Real life examples New opening vignettes introduce the main topic and show the business environment in real life. In addition, the book contains a wealth of shorter and longer case studies featuring companies such as Google, Amazon and Virgin Trains. Pedagogy Clearly written and user friendly, the book boasts a full range of learning tools which include: Learning Objectives, Thinking Around the Subject boxes, Review Questions, and Activities.

Accounting for Managers explains how accounting information is used by non-financial managers. The book emphasises the interpretation, rather than the construction, of accounting information and encourages a critical, rather than unthinking acceptance, of the underlying assumptions behind accounting. It links theory with practical examples and case studies drawn from real life business situations in service, retail and manufacturing industries.

This popular textbook offers a broad and accessible introduction to the building blocks of modern finance: financial markets, institutions and instruments. Focussing on the core elements of the subject, the author blends theory with real-life data, cases and numerical worked examples, linking the material to practice at just the right level of technical complexity. This new edition has updated data and cases throughout, ensuring that it is as up-to-date as possible in this fast-moving area. More assessment and self-test resources have been added to the book to help support students and lecturers. It is ideally suited to students at all levels who take economics, business and finance courses, as well as for those who want to understand the workings of the modern financial world. New to this Edition: - New case studies, including coverage of the Libor and foreign exchange rigging scandals, Bitcoin, the FinTech revolution and issues raised by Brexit - Fully updated data and relevant numerical examples - Coverage of derivatives such as futures, options and swaps - Extensive discussion of regulatory developments since the financial crisis - A companion website featuring teaching resources is available

You might think that anarchism and management are opposed, but this book shows how engaging with the long history of anarchist ideas allows us to understand the problems of contemporary organizing much more clearly. Anarchism is a theory of organizing, and in times when global capitalism is in question, we need new ideas more than ever. The reader of this book will learn how anarchist ideas are relevant to today's management problems. In a series of student-friendly short chapters on contemporary topics, the authors challenge the common sense that has allowed particular forms of organization and market to become globally dominant. Do we always need leaders? Is technological change always a good thing? Are markets the best way to arrange forms of exchange? This challenging book is essential for anyone who wants to understand what is wrong with business school theory and what we might do about it. For students and teachers of management, the standard textbook reproduces the dominant ideas about the way that business should be done. This book turns those ideas on their head, asking awkward questions about authority, technology and markets and demanding that its readers think hard about whether they want to reproduce those ideas too. Students of management, like everyone else, know that the current global system is broken but they don't know what they can do about it. This unique book uses 200 years of anarchist ideas to give readers a clear guide for building the organizations and businesses of the future and places choice and responsibility at the centre of making a new world for people and the planet.

Capital investment decisions are a constant challenge to all levels of financial managers. Capital Budgeting: Theory and Practice shows you how to confront them using state-of-the-art techniques. Broken down into four comprehensive sections, Capital Budgeting: Theory and Practice explores and illustrates all aspects of the capital budgeting decision process. Pamela Peterson and Frank Fabozzi examine the critical issues and limitations of capital budgeting techniques with an in-depth analysis of: Classifying capital budgeting proposals Determining the relevant cash flows for capital budgeting proposals Assessing the economic value of a capital budgeting proposal using different techniques Incorporating risk into the capital budgeting decision Evaluating whether to lease or borrow-to-buy Capital Budgeting: Theory and Practice provides the knowledge, insight, and advice that will allow you to handle one of the most important aspects of your firm's financial management. Advanced enough for practitioners yet accessible enough for the novice, Capital Budgeting: Theory and Practice is your complete guide to understanding and benefiting from the essential techniques of capital budgeting.

Adopting an innovative, open-learning approach to introduce the main principles of financial management in an accessible, non-technical way, this fully updated fifth edition provides a unique focus on the practical application of financial management and its role in decision making. New to this edition: Expanded coverage of key topics such as financing the business Increased coverage of corporate governance issues Even more real-world examples to help illustrate the practical application and importance of the topics discussed Financial statements throughout based on the latest International Accounting Standards Full-colour design, packed with pedagogical features, providing an original learning experience Key features: Written in a unique, 'open learning' style Clear explanations and minimal technical jargon to aid understanding -no previous knowledge of financial management is assumed Based on a solid foundation of theory, but focusing throughout on its value for decision making Covering all the main areas of financial management in sufficient detail to provide a good grasp of the subject Numerous examples, activities and exercises throughout, allowing the reader to test his/her knowledge at frequent intervals Fully supported by a comprehensive range of student and lecturer learning resources, Financial Management for Decision Makers is ideal for undergraduates from a non-finance/accounting discipline taking an introductory module in financial management, and postgraduate/postexperience students on courses such as the ACCA Diploma in Financial Management, Diploma in Management Studies and MBA programmes. The text is also suitable for finance and accounting students as a foundation for further study. Peter Atrillis a freelance academic and author working with leading institutions in the UK, Europe and SE Asia. He has previously held posts as Head of Business and Management and Head of Accounting and Law at University of Plymouth Business School.
