The landscape of copyright law has changed dramatically since the last edition of Understanding Copyright Law in 2005. During the past several years both the Congress and the courts have tried to adapt copyright law to the new, interactive (internet 2.0) digital technologies, such as You-Tube, and Facebook, and to efforts like the Google Book Search Project. This new 5th edition of Understanding Copyright Law has incorporated all the recent case law and legislative developments, focusing on the challenges of the digital age. Written with clarity and precision, this 5th edition of Understanding Copyright Law remains the most accessible and comprehensive text for students of copyright law.

Focus on Grammar and Meaning explores how to teach grammar effectively to second or foreign language learners aged 5–18. It provides teachers with research insights that will help them to reflect on their classroom practice and enable them to experiment with different ways of teaching grammar. Taking a 'systemic-functional' approach, the authors emphasize the importance of linking language and meaning in teaching. Key research studies on grammar instruction are featured, examples from real classroom practice are examined, and activities are provided to help teachers relate the content to their own teaching context. This volume is an outgrowth of the Conference on Research on the Enacted Mathematics Curriculum, funded by the National Science Foundation and held in Tampa, Florida in November 2010. The volume has the potential to be useful to a range of researchers, from established veterans in curriculum research to new researchers in this area of mathematics education. The chapters can be used to generate conversation about researching the enacted mathematics curriculum, including similarities and differences in the variables that can and should be studied across various curricula. As such, it might be used by a curriculum project team as it outlines a research agenda for curriculum or program evaluation. It might also be used as a text in a university graduate course on curriculum research and design. The chapters in this volume are a natural complement to those in *Approaches to Studying the Enacted Mathematics Curriculum* (Heck, Chval, Weiss, & Ziebarth, 2012), also published by Information Age Publishing. While the present volume focuses on a range of issues related to researching the enacted mathematics curriculum, including theoretical and conceptual issues, the volume by Heck et al. provides insights into different instrumentations used by groups of researchers to study curriculum enactment.
