

Illustration A Theoretical And Contextual Perspective

Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. *GENRE IN A CHANGING WORLD* provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. The broad selection of material in this volume displays the full range of contemporary genre studies and sets the ground for a next generation of work.

This book explores Positive Youth Development (PYD) in Roma ethnic minority youth. Standing apart from current volumes, this book focuses on the Roma ethnic minority -- one of the most marginalized and oppressed minority groups in Europe -- and on strengths and resources for optimal well-being in the community. The international and multidisciplinary contributors to this book address the complexities of Roma life in a variety of cultural settings, exploring how key developmental processes and person-context interactions can contribute to optimal and successful adaptation. The conclusions clarify how the PYD of ethnic minority children and youth may be fostered based on the empirical findings reported in the volume. The book draws on core theoretical models of PYD and theories of normative development from the perspective of developmental science to highlight the applicability of these frameworks to Roma groups. With a special focus on cultural, contextual, and socio-economic characteristics of Roma, this project also aims to provide a better understanding of what does and what does not contribute to the success of youth in oppressed minority groups.

Should a lawyer keep a client's secret even when disclosure would exculpate a person wrongly accused of crime? *The Practice of Justice* is a fresh look at this and other traditional questions about the ethics of lawyering.

A pioneering study of a unique narrative form, *Words about Pictures* examines the special qualities of picture

books--books intended to educate or tell stories to young children. Drawing from a number of aesthetic and literary sources, Perry Nodelman explores the ways in which the interplay of the verbal and visual aspects of picture books conveys more narrative information and stimulation than either medium could achieve alone. Moving from "baby" books, alphabet books, and word books to such well-known children's picture books as Nancy Ekholm Burkert's *Snow White and the Seven Dwarfs*, Gerald McDermott's *Arrow to the Sun*, Maurice Sendak's *Where the Wild Things Are*, and Chris Van Allsburg's *The Garden of Abdul Gasazi*, Nodelman reveals how picture-book narrative is affected by the exclusively visual information of picture-book design and illustration as well as by the relationships between pictures and their complementary texts.

Teaching Illustration is a must-have for any college-level art instructor. Packed with a wealth of illustration course syllabi from leading art and design schools across the U.S. and Europe, it offers exciting ideas on topics from editorial illustration to animation, books, and the Internet. Each syllabus includes an introduction, course requirements, a weekly breakdown, suggestions for projects, and selected readings—a comprehensive array of topics, reading lists, and teaching tips for courses at all levels. For beginning educators seeking guidance or for veterans seeking new inspiration, Teaching Illustration is essential for the craft of teaching the next generation of illustrators. • Packed with sample syllabi—a must-have for art teachers and students • Detailed, concrete examples of how to create compelling, inspiring classes Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

A guide to the practice of researching for graphic design projects. It explains key theories; examines the importance of audience, communication theory, semiotics and semantics.

"The Strategic Use of Force in Counterinsurgency: Find, Fix, Fight focuses on how to understand the relationship between the use of force and its outcomes, by looking at counterinsurgencies in Malaya, Vietnam, and Iraq. The relationship is dynamic, meaning academics and practitioners should think and act accordingly"--

Digital technologies are deeply embedded in everyday life with opportunities for information access and perpetual social contact now mediating most of our activities and relationships. This book expands the lens of Cyberpsychology to consider how digital experiences play out across the various stages of people's lives. Most psychological research has

focused on whether human-technology interactions are a 'good' or a 'bad' thing for humanity. This book offers a distinctive approach to the emergent area of Cyberpsychology, moving beyond these binary dilemmas and considering how popular technologies have come to frame human experience and relationships. In particular the authors explore the role of significant life stages in defining the evolving purpose of digital technologies. They discuss how people's symbiotic relationship with digital technologies has started to redefine our childhoods, how we experience ourselves, how we make friends, our experience of being alone, how we have sex and form romantic relationships, our capacity for being antisocial as well as the experience of growing older and dying. This interdisciplinary book will be of great interest to scholars and practitioners across psychology, digital technology and media studies as well as anyone interested in how technology influences our behaviour.

Mental Health in Elite Sport: Applied Perspectives from Across the Globe provides a focused, exhaustive overview of up-to-date mental health research, models, and approaches in elite sport to provide researchers, practitioners, coaches, and students with contemporary knowledge and strategies to address mental health in elite sport across a variety of contexts. *Mental Health in Elite Sport* is divided into two main parts. The first part focuses globally on mental health service provision structures and cases specific to different world regions and countries. The second part focuses on specific mental health interventions across countries but also illustrates specific case studies and interventions as influenced by the local context and culture. This tour around the world offers readers an understanding of the massive global differences in mental health service provision within different situations and organizations. This is the first book of its kind in which highly experienced scholars and practitioners openly share their programs, methods, reflections, and failures on working with mental health in different contexts. By using a global, multi-contextual analysis to address mental health in elite sport, this book is an essential text for practitioners such as researchers, coaches, athletes, as well as instructors and students across the sport science and mental health fields. *The Fundamentals of Illustration 2nd Edition* by Lawrence Zeegen introduces students to the subject of illustration, taking them through the key skills and practical processes required for the study of this exciting degree course. This edition has been updated with a wealth of fresh visuals and contemporary case studies. It includes new and revised content and examples that reflect the changes and developments in the discipline over the past few years. Current visual approaches are examined and evaluated, along with new chapters on visual thinking, idea generation and the illustrator as an artist. A chapter on the professional practice of a freelance designer helps students to understand the realities of this creative career path. Each chapter concludes with a case study, which outlines a brief and then describes each stage of the process, from the illustrator's initial response to the completion of the project. The case studies feature the work of: John Clementson, Tim Vyner, Olivier Kugler, Damian Gascoigne, Ben Kelly and Howard Read. The book also contains a series of interviews with practising illustrators such as Autumn Whitehurst, Stina Persson and Anthony Burrill.

This book is aimed at students and illustrators who are looking to create artworks to fulfill a specific brief, as part of their course, job or career. It leads the reader through the whole thinking process, not just of creation but from the basic essentials which are often overlooked. It explores the very foundations which underpin the choices made in creating an artwork: How is illustration used today? Who is the target audience? How is the image used to convey information? What is the message? Should it be created through truth or metaphor? Packed with

lively illustrations itself, *Meeting the Brief* looks at everything required to make informed decisions from gathering research and the relevance of media placement, to subject matter and the use of visual language. This educational guide guides the reader through his or her brief in detail, covering both the needs of the client as well as considering the audience, in order to get the best possible illustration, not just in artistic terms but in commercial terms too. This is a key text for anyone wishing to make their living in this field.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Delving into the rationale behind influential communication, *The Power And Influence Of Illustration* helps you understand how to work with a message to create convincing illustrations for your audience. Alan Male explains how illustrative imagery can lampoon, shock, insult, threaten, subvert, ridicule, express discontent and proclaim political and religious allegiance. He explores how its tools have been used in the past, and looks at how contemporary illustrators can use their own work to persuade – and discusses where the line between persuasion and propaganda lies. These issues are explored using hundreds of full colour images from international artists, both contemporary and historical. This book looks at some of the world's best illustrators, providing insight into the generally hidden and personal processes involved in the creation of illustration from concept to finished work. Covering a wide range of illustration types, the book explores both the conceptual and practical methodologies and demonstrates the diversity of working methods used. Included are design and advertising; adult fiction publishing; decorative illustration and merchandising; editorial and political cartoons; children's publishing; graphic literature; fashion illustration and journalistic illustration. This is a broad, comprehensive look at the field of illustration which gives insight into each artist's approach and identifies what motivates them and inspires the sort of work they do. The information has been compiled from interviews and is not available anywhere else and includes the work of illustrators such as Ronald Searle, Ralph Steadman, Brad Holland and Quentin Blake. The focus is on artistic excellence which has become commercially successful and will appeal to students, aspiring and practicing illustrators

and those professionals who work with illustrators and as a reference book for a broader reading audience.

A contemporary synthesis of the philosophical, theoretical and practical methodologies of illustration and its future development. Illustration is contextualized visual communication; its purpose is to serve society by influencing the many aspects of its cultural infrastructure; it dispenses knowledge and education, it commentates and delivers journalistic opinion, it persuades, advertises and promotes, it entertains and provides for all forms of narrative fiction. A Companion to Illustration explores the definition of illustration through cognition and research and its impact on culture. It explores illustration's boundaries and its archetypal distinction, the inflected forms of its parameters, its professional, contextual, educational and creative applications. This unique reference volume offers insights into the expanding global intellectual conversation on illustration through a compendium of readings by an international roster of scholars, academics and practitioners of illustration and visual communication. Encompassing a wide range of thematic dialogues, the Companion offers twenty-five chapters of original theses, examining the character and making of imagery, illustration education and research, and contemporary and post-contemporary context and practice. Topics including conceptual strategies for the contemporary illustrator, the epistemic potential of active imagination in science, developing creativity in a polymathic environment, and the presentation of new insights on the intellectual and practical methodologies of illustration. Evaluates innovative theoretical and contextual teaching and learning strategies. Considers the influence of illustration through cognition, research and cultural hypotheses. Discusses the illustrator as author, intellectual and multi-disciplinarian. Explores state-of-the-art research and contemporary trends in illustration. Examines the philosophical, theoretical and practical framework of the discipline. A Companion to Illustration is a valuable resource for students, scholars and professionals in disciplines including illustration, graphic and visual arts, visual communications, cultural and media and advertising studies, and art history.

Illustration practice is not judged purely by visual literacy and technical qualities, but also requires intellectual engagement with its subject matter. *Illustration: A Theoretical & Contextual Perspective*, 2nd Edition examines the breadth and many uses of this diverse discipline, through nearly 300 colour examples. From developing a brief, conducting research and analysing visual language, the book goes on to explore the role of illustration in documentation, commentary, storytelling, persuasion and identity. It concludes with an overview of current professional practice, demonstrating that the ability to communicate meaningfully and effectively for a global audience is key to navigating today's creative industries. Examples of work from award-winning illustrators showcase a huge range of applications, from the author's own collaboration with the British Museum of Natural History and Olivier Kugler's Portraits of Syrian Refugees in Iraqi Kurdistan, to Levi Pinfold's fictional picture book *Black Dog* and Malika Favre's promotional images for the BAFTA (British Academy of Film and Television Arts) Film Awards.

Transecting Securityscapes is an innovative book on the everyday life of security, told via an examination of three sites: Cambodia, the Kurdistan region of Iraq, and Mozambique. The authors' study of how security is enacted differently in these three sites, taking account of the rich layers of context and culture, enables comparative reflections on diversity and commonality in "securityscapes." In *Transecting Securityscapes*, Till F. Paasche and James D. Sidaway put into practice a diverse and contextual approach to security that contrasts with the aerial, big-picture view taken by many geopolitics scholars. In applying this grounded approach, they develop a method of urban and territorial transects, combined with other methods and modes of encounter. The book draws on a broad range of traditions, but it speaks mostly to political geography, urban studies, and international relations research on geopolitics, stressing the need for ethnographic, embodied, affective, and place-based approaches to conflict. The result is a sustained theoretical critique of abstract research on geopolitical

conflict and security—mainstream as well as academic—that pretends to be able to know and analyze conflict “from above.”

Co-published with UCEA, this exciting new textbook is the first to tackle the ISLLC Standard #6—the political context of education. This unique volume helps aspiring school leaders understand the dynamics of educational policy in multiple arenas at the local, state, and federal levels. Leaders are responsible for promoting the success of every student by understanding, responding to, and influencing the political, social, economic, legal, and cultural contexts in which education and learning reside. By presenting problem-posing cases, theoretical grounding, relevant research, and implications for practice, this book provides aspiring leaders with the background, learning experiences, and analytical tools to successfully promote student success in their contexts. Special features: Case studies - provide an authentic illustration of the political dynamics that emanate from individual, social, economic, and cultural issues surrounding all schools. Suggested activities - further aspiring school leaders' understanding of political issues through experiences Companion website – includes shared resources relevant to all ISLLC standards, along with particular activities for ISLLC Standard #6

Combining a winning formula of practical instruction and creative inspiration, *Sketch your World* examines a range of techniques for capturing great sketches on the go, covering topics such as how to improve observation skills, sketch moving subjects and c

This book brings the study of nineteenth-century illustrations into the digital age. The key issues discussed include the difficulties of making illustrations visible online, the mechanisms for searching the content of illustrations, and the politics of crowdsourced image tagging.

Analyzing a range of online resources, the book offers a conceptual and critical model for engaging with and understanding nineteenth-century illustration through its interplay with the digital. In its exploration of the intersections between historic illustrations and the digital, the book is of interest to those working in illustration studies, digital humanities, word and image, nineteenth-century studies, and visual culture. A straight-to-the-point “everything-you-need-to-know” guide to the world of professional illustration for aspiring artists and recent art-school graduates—not only the technical essentials (the difference between narrative versus conceptual illustration, diagramming a composition, mastering negative space, and the impact of different mediums from watercolor to digital to textiles), but industry insights, real-world insider advice, and honest personal development tips from an experienced teacher (“if you say your style is ‘manga’ or ‘anime’ then you have no style”). From a *Newsweek* cover depicting the Bush family as characters on *Game of Thrones*; to the Sistine Chapel (the complete illustrated bible)—visual storytelling through illustration has been an important mode of communication in every culture since ancient times. Unlike a fine artist, an illustrator creates images that serve a specific purpose, and successful illustrators need much more than just talent. Drawing on a decade of teaching, including at Maryland Institute College of Art and as cofounder of the new Baltimore Academy of Illustration, along with over three decades of professional experience as an illustrator for clients like Marvel Comics, Relapse Records, and *The Village Voice*—Greg Houston places aspiring artists and recent graduates squarely in the current marketplace, and inspires them to pursue work in the large and lucrative field of professional illustration in a way that will be personally and professionally rewarding for years to come. *Illustration that Works* demonstrates exactly why illustration is so important to the way we see and communicate today, and how it can be done effectively in an infinite number of styles. Includes: Thought-provoking assignments - Illustrate an op-ed that’s either pro or against religion in the public sphere - Create 3 posters for an HBO documentary series on sex (that can still be displayed anywhere) - Illustrate a pair of identical twins whose lives have veered apart dramatically 400 examples of artwork - Assignments completed by talented students - Pieces from 50 classic and contemporary master illustrators including Brian Sanders, Marshall Arisman, Roberto Parada, Steve Brodner, Paul Rogers, and Greg Spalenka - Houston’s own pieces, both finished and failed

Online Library Illustration A Theoretical And Contextual Perspective

"The Visual Dictionary of Illustration" is a comprehensive guide to the numerous terms associated with, and used within, the field of illustration. The book has been designed for art students, as well as aspiring and professional illustrators and all those interested in this constantly evolving discipline. Over 250 terms are explained in detail, providing the reader with compact definitions, supplemented by compelling and exciting illustrations that offer a clear guide to the many and various illustrative styles and techniques in use today. "The Visual Dictionary of Illustration" is an invaluable reference tool that improves the reader's understanding of the professional terms applied in the field of contemporary illustration and associated creative disciplines.

'History of Illustration' covers image-making and print history from around the world, spanning from the ancient to the modern. Hundreds of color images show illustrations within their social, cultural, and technical context, while they are ordered from the past to the present. Readers will be able to analyze images for their displayed techniques, cultural standards, and ideas to appreciate the art form. This essential guide is the first history of illustration written by an international team of illustration historians, practitioners, and educators.

There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

Get ready to enter the working world of illustration with this freshly updated second edition of Brazell and Davies's *Becoming a Successful Illustrator*. This edition features even more 'Spotlight on...' sections, with advice from practicing illustrators as well as the people that commission them. You can enjoy added coverage in fields such as moving image, character illustration and social media. There are also new exercises to get you started planning and building your business, and over 200 inspirational examples of artwork, most of which are new to this edition. You can expect practical tips on how to seek work, how to market yourself and how to run your illustration business in an enterprising way, with advice that will prove useful long after your first commission.

Building on the resources of the first edition, this continues to be the must-have guide to practicing professionally as an illustrator.

Featured illustrators include: Millie Marotta Mark Ulriksen Natsko Seki Ellen Weinstein Stephen Collins ... and many more

Featured topics include: Finding clients Agency representation Fields of work Financial and legal requirements Skills in art and design Self-promotion Showing work Managing your business

Named a Most Anticipated Book of 2020 by Apple Books, Literary Hub, The Millions, and The Week An indelible novel of teenage

alienation and adult complacency in an unraveling world. Pulitzer Prize finalist Lydia Millet's sublime new novel—her first since the National Book Award long-listed *Sweet Lamb of Heaven*—follows a group of twelve eerily mature children on a forced vacation with their families at a sprawling lakeside mansion. Contemptuous of their parents, who pass their days in a stupor of liquor, drugs, and sex, the children feel neglected and suffocated at the same time. When a destructive storm descends on the summer estate, the group's ringleaders—including Eve, who narrates the story—decide to run away, leading the younger ones on a dangerous foray into the apocalyptic chaos outside. As the scenes of devastation begin to mimic events in the dog-eared picture Bible carried around by her beloved little brother, Eve devotes herself to keeping him safe from harm. *A Children's Bible* is a prophetic, heartbreaking story of generational divide—and a haunting vision of what awaits us on the far side of Revelation.

A groundbreaking study of proverbs in African-American speech from slave times to the present.

Fredman makes the original argument that some of the most innovative works of poetry and art in the postwar period (1945–1970) engaged in a "contextual practice," a term that refers both to a way of making art characterized by assemblage and to a new relationship between art and life, an "erotic poetics."

This Surgeon General's report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco.

Relating Events in Narrative, Volume 2: Typological and Contextual Perspectives edited by Sven Strömquist and Ludo Verhoeven, is the much anticipated follow-up volume to Ruth Berman and Dan Slobin's successful "frog-story studies" book, *Relating Events in Narrative: A Crosslinguistic Developmental Study* (1994). Working closely with Ruth Berman and Dan Slobin, the new editors have brought together a wide range of scholars who, inspired by the 1994 book, have all used Mercer Mayer's *Frog, Where Are You?* as a basis for their research. The new book, which is divided into two parts, features a broad linguistic and cultural diversity.

Contributions focusing on crosslinguistic perspectives make up the first part of the book. This part is concluded by Dan Slobin with an analysis and overview discussion of factors of linguistic typology in frog-story research. The second part offers a variety of theoretical and methodological perspectives, all dealing with contextual variation of narrative construction in a wide sense: variation across medium/modality (speech, writing, signing), genre variation (the specific frog story narrative compared to other genres), frog story narrations from the perspective of theory of mind, and from the perspective of bilingualism and second language acquisition. Several of the contributions to the new book manuscript also deal with developmental perspectives, but, in distinction to the 1994 book, that is not the only focused issue. The second part is initiated by Ruth Berman with an analysis of the role of context in developing narrative abilities. The new book represents a rich overview and illustration of recent advances in theoretical and methodological approaches to the crosslinguistic study of narrative discourse. A red thread throughout the book is that crosslinguistic variation is not merely a matter of variation in form, but also in content and aspects of cognition. A recurrent

perspective on language and thought is that of Dan Slobin's theory of "thinking for speaking," an approach to cognitive consequences of linguistic diversity. The book ends with an epilogue by Herbert Clark, "Variations on a Ranarian Theme." The Third Edition of Family Stress Management by Pauline Boss, Chalandra M. Bryant, and Jay A. Mancini continues its original commitment to recognize both the external and internal contexts in which distressed families find themselves. With its hallmark Contextual Model of Family Stress (CMFS), the Third Edition provides practitioners and researchers with a useful framework to understand and help distressed individuals, couples, and families. The example of a universal stressor—a death in the family—highlights cultural differences in ways of coping. Throughout, there is new emphasis on diversity and the nuances of family stress management—such as ambiguous loss—plus new discussions on family resilience and community as resources for support. There are a few among us who not merely keep a journal, but who with drawings, watercolours, charts, collages, portraits & in a host of other ways, make their journal a work of art. Jennifer New explores the private worlds of these journal keepers. For years illustration has lacked a strong critical history in which to frame it, with academics and media alike assessing it as part of design rather than a discipline in its own right. Illustration Research Methods addresses this void and adds to a fast-emerging discipline, establishing a lexicon that is specific to discussing contemporary illustration practice and research. The chapters are broken down into the various roles that exist within the industry and which illustration research can draw from, such as 'Reporting' and 'Education'. In doing so, users are able to explore a diverse range of disciplines that are rich in critical theory and can map these existing research methodologies to their own study and practice. Supported by a wealth of case studies from international educators, student projects sit alongside those of world-renowned illustrators. Thus allowing users the opportunity to put what they have learnt into context and offering insight into the thinking and techniques behind some of illustrations' greats. Thinking Visually for Illustrators features a wide range of work, demonstrating diverse visual languages, context, ideas, techniques and skills. It also looks at the ways in which illustrators develop their own personal visual language. Contemporary illustrators from all over the world engaged in a diverse range of approaches to the discipline have contributed their artwork and commentaries on visual thinking and the working process. The text also features the work of recent graduates, present students and observations from educators past and present. This edition has been updated to include a new chapter on illustration for the digital context and new approaches to working. Filled with five hundred color and black-and-white illustrations, a visual history of the art of illustration spans more than one hundred years of art, showcasing a broad spectrum of editorial work and advertising illustration, profiling the artists who created it, and critically analyzing its important influence on modern culture, commerce, and society. Illustration: A Theoretical and Contextual Perspective is a comprehensive guide to contemporary illustration. It provides students with an understanding of the theory, research, conceptual processing and contexts of illustration practice. It describes a variety of definitions and philosophies of illustration, together with a relevant historical overview. The book introduces the notion of the illustrator as a socially and culturally aware communicator: an able professional with knowledge, understanding and insight

regarding the context within which they are working and the subject matter that they are engaged with. Examples include: effective and creative written communication and authorship, academic research, art direction and design management.

Smart City Emergence: Cases from Around the World analyzes how smart cities are currently being conceptualized and implemented, examining the theoretical underpinnings and technologies that connect theory with tangible practice achievements. Using numerous cities from different regions around the globe, the book compares how smart cities of different sizes are evolving in different countries and continents. In addition, it examines the challenges cities face as they adopt the smart city concept, separating fact from fiction, with insights from scholars, government officials and vendors currently involved in smart city implementation. Utilizes a sound and systematic research methodology Includes a review of the latest research developments Contains, in each chapter, a brief summary of the case, an illustration of the theoretical context that lies behind the case, the case study itself, and conclusions showing learned outcomes Examines smart cities in relation to climate change, sustainability, natural disasters and community resiliency

"This book examines the breadth and use of illustration... Targeting the latter stages of undergraduate development and post-graduate study there is a particular focus on theory, research, conceptual processing, visual language analysis and the contexts of illustration practice. It also introduces the concept of illustrator as a specialist or authority on a particular subject or as an originator of either fiction and/or non-fiction material"--Back cover.
