Bobbie Faye Sumrall knows that a day without disaster is a day in someone else's life. Criminals have kidnapped her good-for-nothing brother and are demanding her Contraband Queen tiara--the only thing of her mama's she inherited--as random. So Bobbie Faye has to outwit the police, organized crime, former boyfriends, and a hostage she never intended to take (but who turns out to be damn sexy!), in order to rescue her brother, keep custody of her niece, and get back in time to take her place as Queen in the Lake Charles Contraband Festival (think Mardi Gras, with more drinking and pirates). Luckily, Bobbie Faye knows how to handle guns, outsmart angry mama bears, drive a speedboat, and get herself out of--and into--almost every kind of trouble. If only that pesky state police detective (who also happens to be a pissed-off ex-boyfriend) would stay out of her way . . . Catalyst technologies account for over \$1 trillion of revenue in the U.S. economy alone. The applications range from medicines and alternative energy fuel cell technologies to the development of new and innovative clothing fibers. In this book, a World Technology Evaluation Center (WTEC) panel of eight experts in the field assesses the current state of research and development in catalysis by nanostructured materials, its sources of funding, and discusses the state of the field with respect to productivity and leadership in various nations around the world. In addition to showing the numerous and highly advantageous practical applications of the field, the panel concludes that Western Europe is currently the most productive region, followed closely by the United States. Still, the research and development output of the People's Republic of China has recently surpassed that of Japan and is now poised to surpass that of the U.S. as well. As such, this assessment is a timely review of the field's progress, taking into account the increasing contributions from Asia, and will be essential reading for professionals, whether they are seeking an in-depth summary of the state of the art or a broad view of trends affecting the discipline.

This innovative work argues that Shakespeare was as great a philosopher as he was a poet, and that his greatness as a poet derived even more from his power as a thinker than from his genius for linguistic expression. Accordingly, Leon Craig's interpretation of the plays - focusing primarily on Macbeth and King Lear, but including extensive comments on Othello, The Winter's Tale, and Measure for Measure - are intended to demonstrate what can be gained from reading Shakespeare 'philosophically.' Shakespeare, Craig argues, had a persistent fascination with the relationship between politics and philosophy, and even more precisely, with the idea of a philosophical ruler. Macbeth and King Lear are given detailed exposition for the special light they cast on tensions between philosophy and politics, knowledge and power. They show how the pursuit of an adequate understanding of certain practical issues - transient yet recurring - necessarily leads to considerations that far transcend the particular circumstances in which these practical problems arise. Metaphysics, cosmology, and man's confrontation with nature, were made dramatically manifest by Shakespeare to challenge and promote philosophic activity among his audience and readers. Unconventional in its approach, but working within the tradition of such critics as Allan Bloom and Harry Jaffa, Craig's book makes a substantial contribution to understanding the general principles of Shakespearean drama.

This volume in the NATO Science for Peace and Security Series contains the papers of the Advanced Training Course (ATC) 'Legal Aspects of Combating Terrorism'. The purpose of this course was to support NATO on defence issues related to terrorism and united experts from various disciplines to give participants an understanding of how the various dimensions of the laws and their application fit together. In addition to the lectures that can be found in this book, the course was divided into three modules: the legal response to terrorism in general terms; combating terrorism using lawful means; and harmonizing the Law of Armed Conflict (LAC), national laws and NATO in the fight against terrorism. One of the main questions dealt with in this work is whether, in the face of the new threat, terrorism should still be countered through the ordinary means of criminal law, or whether there should be a significant shift in enforcement methods, including a less multilateral approach to decision-making and an increased use of military force.

In the pages of *An Alexandrian Anthology*, we follow the delight of travelers discovering the strangeness of the city and its variety and pleasures, its beaches and gardens, its elegant villas, duck shoots in the marshes, desert expeditions to ancient monasteries and vanished vineyards. Most of all they are haunted by the city's resplendent past--the famous Library, the temple built by Cleopatra for Antony, the great Pharos lighthouse, one of the seven wonders of the world, of which only traces remain--we follow our travelers here too as they voyage through an immense ghost city of the imagination.

Clement Greenberg (1909–1994), champion of abstract expressionism and modernism—of Pollock, Miró, and Matisse—has been esteemed by many as the greatest art critic of the second

half of the twentieth century, and possibly the greatest art critic of all time. This volume, a lively reassessment of Greenberg's writings, features three approaches to the man and his work: Greenberg as critic, doctinaire, and theorist. The book also features a transcription of a public debate with Greenberg that de Duve organized at the University of Ottawa in 1988. Clement Greenberg *Between the Lines* will be an indispensable resource for students, scholars, and enthusiasts of modern art. "In this compelling study, Thierry de Duve reads Greenberg against the grain of the famous critic's critics—and sometimes against the grain of the critic himself. By reinterpreting Greenberg's interpretations of Pollock, Duchamp, and other canonical figures, de Duve establishes new theoretical coordinates by which to understand the uneasy complexities and importance of Greenberg's practice." John O'Brian, editor of *Clement Greenberg: The Collected Essays and Criticisms* "De Duve is an expert on theoretical aesthetics and thus well suited to reassess the formalist tenets of the late American art critic's theory on art and culture. . . . De Duve's close readings of Greenberg . . . contain much of interest, and the author clearly enjoys matching wits with 'the world's best known art critic.'" *Library Journal*

Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

Still Rainin' Still Dreamin' showcases one hundred of Anderson's prize-winning black-and-white images, which collectively chronicle three decades of life in Ketchikan,

Gilbert Ryle was one of the most important and controversial philosophers of the Twentieth century. Long unavailable, *Critical Essays: Collected Papers Volume 1* includes many of Ryle's most important and thought-provoking papers. This volume contains 20 critical essays on the history of philosophy, with writing on Plato, Locke and Hume as well as important chapters on Russell and Wittgenstein. It also includes three essays on phenomenology, including Ryle's famous review of Martin Heidegger's *Being and Time* first published in 1928. Although Ryle believed phenomenology 'will end in self-ruinous subjectivism or in a windy mysticism' his review also acknowledged that Heidegger was a thinker of great originality and importance. While surveying the developments in the philosophy of language and philosophical logic, Ryle sets out his

own conception of the philosophers' role against that of his predecessors and contemporaries. Together with the second volume of Ryle's collected papers *Collected Papers Volume 2* and the new edition of *The Concept of Mind*, all published by Routledge, these outstanding essays represent the very best of Ryle's work. Each volume contains a substantial introduction by Julia Tanney, and both are essential reading for any student of twentieth-century philosophies of mind and language. Gilbert Ryle (1900 -1976) was Waynflete Professor of Metaphysics and Fellow of Magdalen College Oxford, an editor of *Mind*, and a president of the Aristotelian Society. Julia Tanney is Senior Lecturer at the University of Kent, and has held visiting positions at the University of Picardie and Paris-Sorbonne.
