Commercial Agents and the Law is a practical approach to the modern law relating to commercial agency agreements, a complete guide to the workings of the relationship between commercial agents and their principal within its domestic and European context. This book is a complete guide to the workings of the relationship between commercial agents and their principal within its domestic and European context. The common law rules governing the relationship between principal and agent were pretty well established and well understood by English lawyers when, in 1993, the Commercial Agents (Council Directive) Regulations were enacted. The 1993 Regulations implement EC Directive 86/653 on self-employed commercial agents. The 1993 Regulations, like the EC Directives, are not, however, a complete code of rules governing the relationship, so they have to co-exist with the pre-existing common law rules. Both sets of principles therefore have to be applied.

Contracts: Cases and Doctrine, Sixth Edition, features a mix of lightly-edited classic and contemporary cases that stresses current contract doctrine along with the essential lawyering skill of case analysis—how to sift through the facts of the case to discern the prevailing rules and theory. Randy Barnett and Nate Oman's innovative text introduces each case and provides the historical background of the iconic cases that make the study of contract law engaging. Study Guide questions help students identify salient issues as they read each case. Judicial biographies of each judge provides additional

context. Key Features of the New Edition: The 6th Edition has been edited to make it even more modular and therefore easier for professors to select which doctrines to cover. The introductory materials have been shortened to permit a speedier entry to whichever basic doctrine the professor chooses to begin with. A new section on public policy defenses has been added. Recent developments involving arbitration agreements in the wake of the Supreme Court's AT&T Mobility case are also covered. In addition, roughly a dozen new cases have been substituted, chosen for their interesting facts or their proven pedagogical usefulness. As always, every effort is made to provide students with background materials on the litigation, such as new judicial biographies and excerpts from recently published scholarship dealing with the cases covered. New cases include: *Jordan v. Knafel* *Arnold Porter v. Fuqua Industries* *Nguyen v. Barnes & Noble Inc.* Also, in keeping with the book's focus on the "classic" cases we have included some iconic cases missing from earlier editions, including: *Masterson v. Sine* *Security Stove & Manufacturing Co. v. American Railway Express* *Lefkowitz v. Great Minneapolis Surplus Store* *Lawrence v. Fox* *Harris v. Watson* This book have been written by experienced lecturers in commercial law in the Department of Mercantile Law at the University of South Africa. It provides non-law students with a succinct exposition of the general principles of commercial law. The selection of topics was influenced by the syllabus of the Independent Regulatory Board for Auditors for the law service course, as well as the syllabus for basic law courses of the Institute of Bankers.
