How are we to conduct research on the continuously changing world of later life? How do we research new ageing populations and groups that have been largely absent from research? What needs to be considered when using qualitative methods in ageing research? Despite a large and growing body of work that uses qualitative methods in ageing research, very few authors reflect on their use of methods when sampling or interviewing older people. This edited collection on researching later life and ageing fills the gap by bringing together leading and emerging scholars from the UK, Australia and Canada to critically reflect on their use of qualitative methods in gaining knowledge of under-researched groups of older people and to point to future research agendas.

As today's teachers prepare to instruct a new generation of students, the question is no longer whether technology should be integrated into the classroom, but only "how?" Forced to combat shorter attention spans and an excess of stimuli, teachers sometimes see technology as a threat rather than a potential enhancement to traditional teaching methods. The Handbook of Research on Educational Technology Integration and Active Learning explores the need for new professional development opportunities for teachers and educators as they utilize emerging technologies to enhance the learning experience. Highlighting the advancements of ubiquitous computing, authentic learning, and student-centered instruction, this book is an essential reference source for educators, academics, students, researchers, and librarians.
